V3. 11/10/22

# I N T R O

Launched in 2012, torq surfboards created a new standard in the epoxy surfboard market, offering an unmatched combination of strength and performance. This year sees the innovation step up a gear, with new shapes, new graphics, X-Lite collaborations with Channel Islands surfboards and the world's first EPS/Epoxy Pre-Preg surfboard. The torq range now offers 7 types of surfboard technology for all levels of surfer.

**ACT**

Torq ACT surfboards are the world's first EPS/Epoxy Pre-Preg surfboards. The technological advantages of Pre-Preg are immense, but the most significant advantage is 100% controlled process with ZERO surplus resin.

On any surfboard the resin's function is to hold the fiber in place. It offers little structural integrity of its own, little flex and little impact strength. As a material without the fiber it is heavy and brittle. Any surplus resin is dead weight - resisting flex, adding weight.

With Pre-Preg process the perfect amount of resin is added to the cloth by machine before the shaped blank is laid up - zero surplus, zero dead weight.

**COMP2**

The Comp is the go to shortboard for advanced surfers looking to take their surfing to the next level, fine tuned to support even those surfing at the highest levels.

**GO-KART**

This board does everything and more. If you're looking for a board that surfs like a shortboard but without the limitations of a normal shortboard, this is for you.

5'10 x 20" x 2 1/2"	- 31.9ltr
6'2 x 20 1/2" x 2 3/4"	- 37.3ltr
6'6 x 21 1/2" x 2 7/8"	- 43.9ltr

Color option:  
Brushed/Black Rail

**PG-R**

The PG-R the most important board in your quiver. It's the board you'll surf 80% of the time in less than stellar waves - a board that turns average into excellent.

5'6 x 20 1/2" x 2 3/8"	- 30.6ltr
5'10 x 21" x 2 1/2"	- 35.3ltr

### CHOPPER

We've updated the Chopper with more forward volume for a more flowy style of surfing but with slightly more tail rocker for tighter turns and aggressive surfing. This is a very user friendly board for small wave days and pumping days as well.

- 6'10 x 20 3/4" x 2 5/8" - 42.6ltr
- 7'2 x 21 1/4" x 2 3/4" - 47.5ltr
- 7'6 x 21 3/4" x 2 7/8" - 52.5ltr

Color option:

### M2.0

#### M2.0

Performance minimal's are one of the most versatile boards you can own. Perfect for gliding small clean waves and with the paddle power for larger or junkier surf.

Our upgraded M2.0 maximises each of the features that make these boards so popular.

- 7'2 x 21 1/2" x 2 7/8" - 50.6ltr
- 7'6 x 22" x 21 5/16" - 55.2ltr
- 7'10 x 22 1/2" x 3" - 60ltr

Color option:  
Bamboo Deck

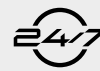

### V+

The Volume Plus takes the trend for high volume wide boards into the midlength model, creating a board with the stability and paddle ability of a much longer board, but in a compact, easier to turn package.

- 7'4 x 22" x 3" - 55.9ltr
- 7'8 x 22 1/2" x 3 3/16" - 63.9ltr
- 8'0 x 22 7/8" x 3 1/4" - 68ltr

Color option:  
Bamboo Deck

### 24/7

The 24/7 is the go to, all round longboard design for every day of the week. It's a board you can put in the van without checking the surfcam; from kneehigh to overhead, for noseriding, cruising or turns, it works.

- 9'0 x 23" x 3 1/8" - 73ltr

Color option:  
Bamboo Deck

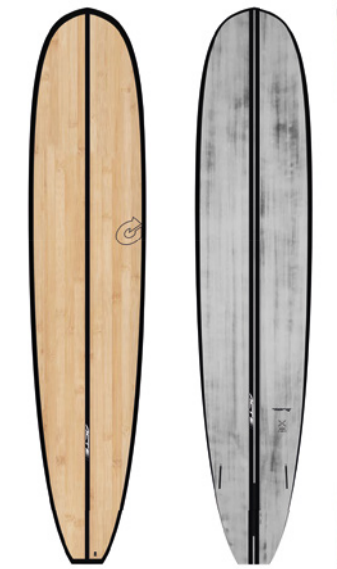

### THE DON HP

The Don HP model is a fine tuned race car, designed for tight in the pocket surfing but still capable on the nose.

- 9'1 x 21 7/8" x 2 13/16" - 62.9ltr

Color option:

**TORQ X MINVIELLE**  
with **EDOUARD DELPERO**

Announcing our latest Team Rider, and shaper co-lab:

2019 Surf Relik World Longboard champion, Edouard Delperero has been riding Torq shortboards for a while. Now with the addition of our collaboration with his long time shaper, Alain Minvielle, we can announce Edouard as full torq team rider. Edouard will be riding our shortboard and midlengths in ACT and TEC, with a couple of signature longboard models to be released as a Torq x Minvielle collaboration.

For over thirty years, Alain Minvielle has created unique surfboards combining performance and elegance. With a team of professional surfers including 2 world longboard champions, Minvielle Surfboards has a rare pedigree and proven track record.

The collaboration with Torq surfboards will see 2 longboard shapes that Alain and Edouard have refined over years of working together produced in Torq ACT next level pre-preg technology and TEC epoxy composite options.

**EDOUARD DELPERO PRO**

This is the model Edouard won his 2019 Surf Relik World longboard title on.

Edouard and Alain worked on that shape to find the perfect balance of modern and classic surfing on a Longboard.

The aggressive outline and rocker will allow you to manoeuvre the board at your highest potential while the lift will allow you to hold noserides in critical sections of the waves.

This model took Edouard on top of the 2019 Relik World Longboard Tour, 4 WSL European titles and at the first step of the WSL Cuervo surf Ranch Classic in 2021 with smooth progressive lines and critical noserides.

**SUMMER FISH**

Our summer fish is short but wide with hidden volume; paddling is so easy it feels like you're cheating. But with a drawn in swallow tail that's lively and responsive.

Small waves, onshore days, first shortboard, step down for a longboard. No matter, this is the board that proves the old saying – there's no such thing as bad surf.

**FISH**

In keeping with the original Fish design, this is by far the fastest board in the TEC line.

The wide template, low rocker, swallow tail and twin fins make this super fast and super fun.

**THE DON HP**

Modern longboarding has a variety of skill and style that is hard to compare in any other sport. The Don HP model is a finer turned race car, but capable on the nose.

9'1 x 21 7/8" x 2 13/16" - 63ltr

**THE DON and DON XL**

The Don is a versatile design – stable on the nose, straight and fast through the middle and lively in the tail with the added advantage of the Torq TEC construction.

8'6 x 22 1/4" x 2 5/8" - 57.9 ltr  
 9'0 x 22 1/2" x 2 3/4" - 64.7ltr

 9'6 x 23 1/4" x 3 1/4" - 83.9ltr

**EDOUARD DELPERO PRO**

This is the model Edouard won his 2019 Surf Relik World longboard title on.

Edouard and Alain worked on that shape to find the perfect balance of modern and classic surfing on a Longboard.

The aggressive outline and rocker will allow you to manoeuvre the board at your highest potential while the lift will allow you to hold noserides in critical sections of the waves.

This model took Edouard on top of the 2019 Relik World Longboard Tour, 4 WSL European titles and at the first step of the WSL Cuervo surf Ranch Classic in 2021 with smooth progressive lines and critical noserides.

9'1 x 22 1/4" x 2 3/4" - TBC

**EDOUARD DELPERO CLASSIC**

Alain Minvielle has extensive shaping experience in California and a fine appreciation for the flow and glide of the classic style. With Edouard's input they have created a Classic shape inspired by the classic 60's model of Longboarding (no edge) while adding some more modern bottom line to find the perfect cruiser with surprising manoeuvrability.

The critical part of this design is in the rocker and volume distribution - the curve of the rocker will allow you to maintain noserides in the pocket while gliding in small conditions as much as in larger waves. Finally the unique distribution of volume through the board, from a thick nose to a thin tail, will allow you to cross step with grace and turn with ease.

**PODMOD by CHANNEL ISLANDS**

In 2000 the original Pod rapidly became a global favorite, allowing surfers to drop six inches off their shortboards and revolutionize punting.

The Pod Mod design is a heavily modified Pod, designed to be ridden even shorter and wider than the original, catering to the surfer that wants a little more volume forward to catch waves but doesn't want to sacrifice performance. The tail has been widened for small wave glide, and the original single to double concave has been replaced with a flat entry to concave vee for quick rail to rail transitions.

Experienced surfers ride this board 3"- 6" shorter than you are tall.

**CHANCHO by CHANNEL ISLANDS**

Whether new to surfing or just looking to enjoy a cruisy session, the all-new Chancho is a super user-friendly, stable board that catches waves with ease. The Chancho boasts generous volume for its mid length size, and features low nose rocker for early wave entry. Its subtle vee-bottom contours that run through the fins help it turn effortlessly.

An offspring of the popular Water Hog model, the Chancho is available in X-Lite construction.

## TET CS

The torq TET-CS, or Carbon Strip utilises the same advanced TET process with a performance oriented lay-up. The TET-CS Mod Fun features a UD Carbon Strip on the base and deck for strength but allows torsional flex.

These boards feel more lively than the standard TET; slightly lighter and more responsive, making them even more fun to surf, but just as strong as before.

For full details on the shape range, check the TET pages.

## MODFISH

With a shape that's more today than yesterday, our modern "fish" design is built for speed. Excelling in chest to overhead high waves, it performs on those hollow, glassy days, yet enjoys mushy, sloppy and less than perfect conditions too.

5'11 x 20 3/8" x 2 1/2"	- 33.2ltr
6'3 x 20 1/2" x 2 1/2"	- 36ltr

7'8 x 22 1/2" x 3 3/16"	- 64ltr
8'2 x 22 7/8" x 3 1/4"	- 70.5ltr

## MODFUN

This crossover range caters to all levels of surfers in virtually every condition. From waist high mush to overhead and hollow. The versatility of the Mod Fun makes them an excellent choice if you need one board to handle all the conditions where you live and travel.

6'8 x 21" x 2 3/4"	- 41.8ltr
7'2 x 21 1/4" x 2 3/4"	- 47.2ltr
7'6 x 21 1/2" x 2 7/8"	- 52.4ltr

## LONGBOARD

8'0, 8'6, 9'0 – these are super versatile, user friendly longboards. With medium entry rocker and full outline you'll find a board that glides in the small stuff and can be ridden from on the nose.

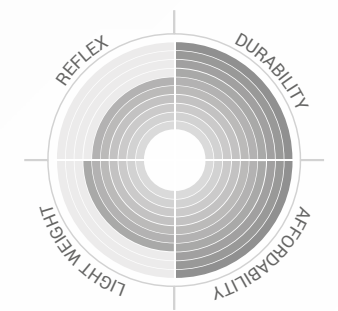

The 9'1 and 9'6 are more traditional noseriders, focussed on stability and trim.

With a shape that's more today than yesterday, our modern "fish" design is built for speed. Excelling in chest to overhead high waves, it performs on those hollow, glassy days, yet enjoys mushy, sloppy and less than perfect conditions too.

Comprised of a full nose and wide mid, with clean balanced curves that blend into a swallow tail. The bottom contours through single to double concave with a lightly flipped nose. Tune to your taste with Tri-Quad option.

This crossover range caters to all levels of surfers in virtually every condition. From waist high mush to overhead and hollow. The versatility of the Mod Fun makes them an excellent choice if you need one board to handle all the conditions where you live and travel.

Featuring a medium full nose and shallow mid-entry there is enough volume for smaller days and weaker surf. As the surf jumps up, step back and the board transforms. You'll find a board that feels shorter than it's length, delivering predictable handling and performance. Tri-fin set-up.

6'8 x 21" x 2 3/4"	- 41.8ltr
7'2 x 21 1/4" x 2 3/4"	- 47.2ltr

V+

The Volume Plus takes the trend for high volume wide boards into the midlength model, creating a board with the stability and paddle ability of a much longer board, but in a compact, easier to turn package.

These boards suit all surfers of all abilities, whether looking for a first board or quiver builder for fun days. The high volume makes it super easy to catch waves while the rocker and bottom contours make this lively and agile underfoot with more performance than you would expect from a larger board. Great for beginners, great for bigger surfers wanting a shorter board.

Tri-fin set-up on all styles except the Wood design which is 2+1.

8'0, 8'6, 9'0 – these are super versatile, user friendly longboards. With medium entry rocker and full outline you'll find a board that glides in the small stuff and can be ridden from on the nose. Progressive surfers will find a quick midsection, slightly pulled tail, with enough release to keep the board fast and loose. The 8'0 has a thruster set up for a more funboard feel, the 8'6 and 9'0 are 2+1 standard longboard set ups.

The 9'1 and 9'6 are more traditional noseriders, focussed on stability and trim. These are excellent for both developing and skilled longboarders aiming for traditional style surfing in smaller waves. Low rockered a wide nose, these are super stable with tons of glide. The 9'1 has a harder rail through the tail with a double concave vee for manoeuvrability. The 9'6 has softer rails and a rolled bottom for classic trim and hold.

9'6 x 23 1/2" x 3 1/4"	- 88ltr

Torq TET WOOD takes our super low waste, high accuracy TET technology and adds another level of durability.

Our standard TET is recognised as one of the strongest, most low impact products on the market due to our combination of highly efficient, low waste process and very long product lifespan. With the addition of a wood layer, the deck strength is even better

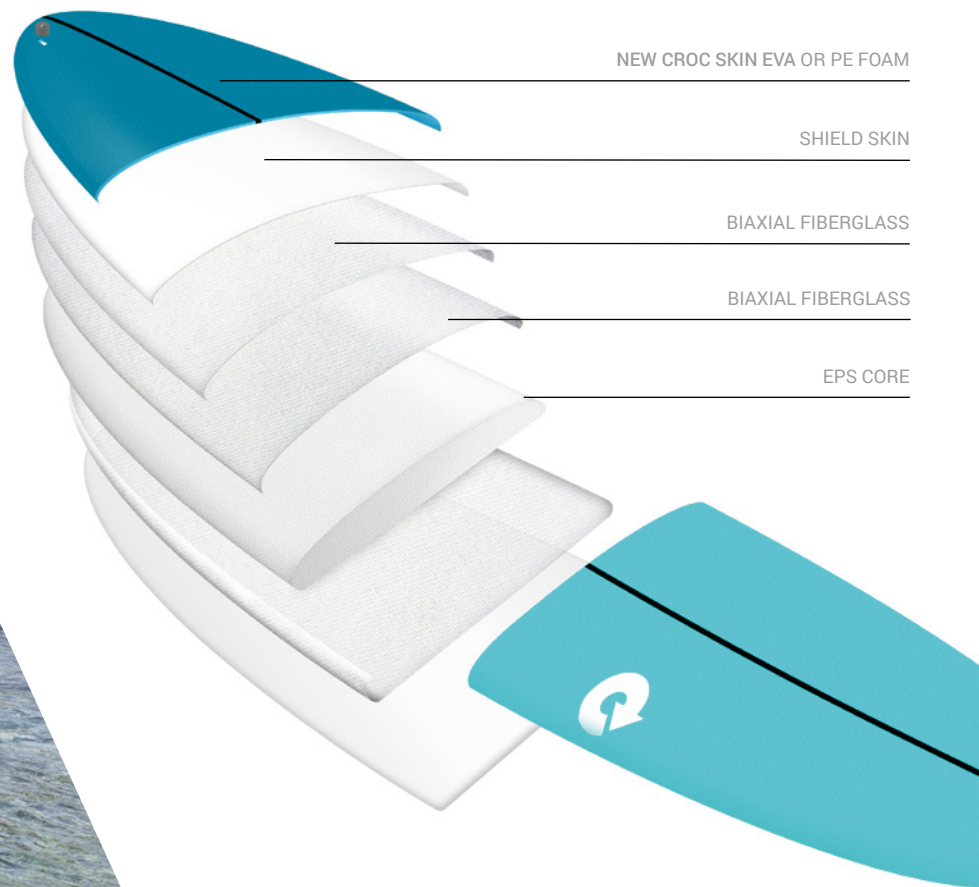

Torq Soft Deck surfboards combine the torq revolutionary epoxy technology construction with a soft vacuum bonded foam layered deck. We now offer either PE foam deck or a textured EVA foam deck.

Our unique combination of advanced materials, high tech construction and integrated Futures fin boxes creates a board that is both light and extraordinarily strong and durable; ensuring your new torq surfboard will keep you stoked from your first wave to your last.
